buildHeap

1. Sort the array – it's a heap!

U

```
1 template <class T>
    void Heap<T>::buildHeap() {
        for (unsigned i = parent(size); i > 0; i--) {
            heapifyDown(i);
        }
        }
    }
}
```
