_insert(6.5)

Insertion into an AVL Tree

Insert (pseudo code):

- 1: Insert at proper place
- 2: Check for imbalance
- 3: Rotate, if necessary
- 4: Update height

```
1 struct TreeNode {
2   T key;
3   unsigned height;
4   TreeNode *left;
5   TreeNode *right;
6 };
```
